A Valuable TREATISE, entitled

"Means of preserving Health

AND

PREVENTING DISEASES;"

Founded principally on an attention to Air and Climate, Drink, Food, Sleep, Exercise, Cloathing, Passions of the Mind, and Retentions and Excretions—By SHADRACK RICKERSON, Physician in New-York.

RECOMMENDATIONS.

We, the subscribers, having examined a Treatise on the "Means of preserving Health and preventing Diseases," composed by Doctor Shadrack Rickerson of this city, embrace, with pleasure, the present opportunity of giving it our decided and public approbation. The style of the work is performed in so plain and intelligible a manner that it may be readily comprehended by every person of ordinary information; the principles inculcated are uniformly supported by well adapted quotations from the best authors on the subject, forming in the whole a collection of facts and opinions well worthy the attention of every class of society.

New York, September 1st, 1806.

SIR,

I have perused the work you have put into my hands, relative to the "Means of preserving Health and of preventing Diseases."

It appears to me to be arranged in a perspicuous manner, and to contain principles which will receive general approbation.

You have also very judiciously availed yourself of the observations of some of the ablest writers of the present day, which will give an additional value to your work, especially with those who may not have access to the originals.

Accept, sir, my best wishes for the success of your undertaking.

Your humble servant,
DAVID HOSACK.

Dr. Rickerson.

New York, September 1st, 1806.

We hope this publication will have the good effect of carrying the valuable cautions and precepts which it contains into many places, and recommending them to the attention of many families and persons whom otherwise they might never have reached.

This benefit, together with that of recalling to the minds of many who are too apt to forget the salutary advice it offers, will, we are confident, afford to the benevolent and judicious author, a compensation for all the labor he has bestowed in preparing it for the use of the public."

Med. Repository and Review of American publications on Med. Surgery, and the auxiliary branches of science, for August, September, and October 1806.—By Doctors Mitchell and Miller.

Similar recommendations highly approbating the foregoing publication, have been received from Dr. Ramsay, of Charleston, and Dr. B Waterhouse, of Cambridge.

We, the subscribers, having been favored with the perusal of a book composed by Doctor Rickerson, of New-York, entitled "Means of preserving Health and preventing Diseases," do, with much pleasure, give it the sanction of our approbation, and cheerfully co-operate with our respectable brethren of the Faculty in other places, in recommending it as a valuable and useful guide to health, and containing directions well calculated to prevent or mitigate diseases; and therefore worthy the attention of every family and individual.

We confidently hope, that the merit of this little American work will be duly appreciated, and that thereby its benevolent and judicious author will be amply compensated for his labor and good intentions.

Sloop Experiment,

FOR PASSENGERS ONLY.

ELIHU S. BUNKER begs leave to inform his friends and the public, that he will, on the first of July, commence running a sloop, of about one hundred and ten tons burthen, between the cities of New-York and Hudson, for the purpose of carrying Passengers.

Few people, who have had occasion to take passage up or down the North River, but have experienced the inconvenience and risk in going on board vessels deeply loaded and lumbered on deck; therefore captain Bunker has determined to take no freight on board the Experiment, which will remedy that inconvenience and entirely do away the risk.

The owners of this vessel, being desirous to render the passage as short, convenient and agreeable as possible, have not only taken care to furnish her with the best Beds, Bedding, Liquors, Provisions, &c. but they have been at very great expense and trouble in procuring materials and building her on the best construction for sailing and the accommodation of Ladies and Gentlemen travelling on business or for pleasure.

The Experiment will leave New-York every Wednesday Evening precisely at 6 o'clock, and Hudson every Sunday Morning at eight o'clock, throughout the season.

Captain Bunker having been several years engaged in the freighting business between New-York and Hudson, has become well acquainted with every part of the river; and he hopes, by attention and punctuality, to merit the patronage of Ladies and Gentlemen from the southward, who may visit the celebrated Ballston, Saratoga and Lebanon SPRINGS, or Travellers who may have occasion to travel through the northern states. The shortness of the passage to Hudson when compared with that to Albany or any place above Hudson, (where the river is impeded by bars, islands and overslaws that render it impossible for fast-sailing vessels to pass) he thinks will induce most people who are acquainted with the difference, to take passage to Hudson, where carriages or boats can at all times be had, at a moderate expense, to convey them to Albany, Troy, Lansingburg, or the Lebanon Springs, which are about 30 miles distance.
