

worth of young timber. For this purpose there is a well established system of lookout stations, and of patrol in conjunction with the U. S. Government. About 175 men are distributed throughout the State, who are constantly upon the watch to discover and extinguish fires; giving particular attention during the danger seasons in spring and fall. The laws against setting out fires are very strict. The State and the county divide the expense of extinguishing fires.

By a recent law the Department of Forestry is directed to care for "roadside trees" or those growing within the right-of-way of any public highway in the State, and no tree can be cut or trimmed by a corporation or individual without a permit from a Forest Warden, after application to the State Forester. The same Act makes it illegal to post commercial advertising signs on trees, or along highways, and citizens are empowered and Forest Wardens directed to remove them.

A State forest nursery, established in 1914, furnishes trees at cost, forest planting and for planting along roadsides.
