

The undersigned has endeavored faithfully to incorporate the Acts of the late Legislature, in their proper places, in the Code. They are distinguished by an asterisk (*) at the commencement of each section. He has likewise labored to make the Index complete, minute and accurate. The Index to the first volume, containing the Public General Laws, is at the close of the volume, and refers to articles and sections; in the second volume, containing the Public Local Laws, each article is separately indexed, and the references are to sections.

The Act of Assembly by which the Code was adopted, and the Act defining the powers and duties of the undersigned, and directing the printing of the Code, will be found on the following pages.
