The Southern Regional Education Board operates under terms of the Southern Regional Education Compact of 1949, which the legislatures of Maryland and fifteen other states have ratified. Its purpose is to help develop graduate, professional, and technical education in the South through interstate cooperation to achieve programs of high caliber without unnecessary duplication. The Southern Regional Education Board is active in approximately twenty-five academic fields. It administers the regional education contracts through which states lacking schools in certain fields are able to secure training for their students at institutions operated either by other states or by private corporations. The Southern Regional Education Board also studies needs and resources in various academic fields and joins with universities in Memoranda of Agreement to plan the development of specific programs on a regional basis. The Administrative work of the Southern Regional Board in Maryland is carried on by the University of Maryland (Code 1951, 1957 supp., Art. 41, secs. 160A-160D). The state is represented on the Southern Regional Education Board by the Governor and four other persons appointed by him.
