

unless the time shall be extended by the board, a written report which shall set forth:

1. Whether the proposed drainage is practicable or not.
2. Whether it will benefit the public health or any public highway or be conducive to the general welfare of the community.
3. Whether the improvement proposed will benefit the lands in question sufficiently to warrant the probable expenditure.
4. Whether or not all the lands that will be benefited are included in the proposed drainage district.

They shall also file with their report a map of the proposed drainage district, showing the location of the ditch or ditches, or other improvements to be constructed with an approximate estimate of the cost, and the lands with the owners' names so far as they can be learned, that will be affected thereby, and such other information as they may have collected that will tend to show the correctness of their findings.

SEC. 4. *Be it enacted*, That the Board of County Commissioners shall consider this report at their first meeting. The engineer and other two viewers being present. If the viewers report that the drainage is not practicable or that it will not benefit the public health, or any public highway, or be conducive to the general welfare of the community, and the Board of County Commissioners shall approve such finding, the petition shall be dismissed at the cost of the petitioners. If the report of the viewers is favorable to the project and the Board of County Commissioners shall so find after hearing all the evidence, they shall make such recommendations as they think proper to the viewers, and direct them to make a complete survey, plans and specifications, and estimate of cost for the tiles, drains or levees, or other improvements, and fix a time when said engineer and viewers shall complete and file their final reports, not exceeding sixty days, unless extended by the commissioners in writing.

SEC. 5. *Be it enacted*, That the engineer and viewers shall have power to employ such assistants as may be necessary to make a complete survey of the drainage district, and shall enter upon the ground and make a survey of the main drain or drains and all their laterals. The line of each ditch, drain or levee shall be plainly and substantially marked on the ground. The course and distance of each ditch shall be carefully noted and sufficient notes made, so that it may be accurately platted and mapped. A line of levels shall be run for the entire work and sufficient data secured from which accurate
