

——— Iron Ores.

Mineral Resources U. S., 1892, Washington, 1893.

Statistics and remarks on production, character of ores and workings, pp. 26, 34, 37, 43.

BOYLE, C. B. A Catalogue and Bibliography of North American Mesozoic Invertebrata.

Bull. U. S. Geol. Surv. No. 102, 1893, pp. 1-313.

House Misc. Doc., 52nd Cong., 2nd sess., vol. xxiv, No. 7.

CLARK, WM. BULLOCK. The Available water power of Maryland.

Monthly Rept. Md. State Weather Service, vol. iii, 1893, pp. 7-9.

Many facts on drainage areas and streams.

——— Physical Features [of Maryland]. pp. 11-54 of Maryland, its Resources, Industries and Institutions. Baltimore, 1893.

A broad review and discussion of the leading topographical features of the eastern United States and especially Maryland.

——— The Leading Features of Maryland Climate.

Monthly Rept. Md. State Weather Service, vol. iii, 1893, pp. 1-6.

Discussion of the temperature, precipitation, humidity, winds and barometric pressure.

——— The Annual expedition of students in geology, 1892.

Johns Hopkins Univ. Cir. No. 103, vol. xii, 1893, pp. 53-54.

Itinerary of trip and description of localities visited.

——— The Mesozoic Echinodermata of the United States.

Bull. U. S. Geol. Surv. No. 83, 1893.

House Misc. Doc., 52nd Cong., 1st sess., vol. xx, No. 336.

CLARKE, F. W. Report of work done in the Division of Chemistry and Physics, 1891-92.

Bull. U. S. Geol. Surv. No. 113, 1893.

House Misc. Doc., 52nd Cong., 2nd sess., vol. xxiv, No. 7.

Analyses of feldspars from Jones Falls, Baltimore (110); ottrelite from Liberty, Frederick county (111); piedmontite from Pine Mt., Monterey, Pa. (111).

DARTON, N. H. The Magothy Formation of Northeastern Maryland.

Amer. Jour. Sci., 3rd ser., vol. xlv, 1893, pp. 407-419, map.

An arenaceous deposit, probably identical with the "alternate clay sands" of Uhler, and lying between the Albrucean series of the Potomac and the bottom of the marine Cretaceous.

——— Cenozoic History of Eastern Virginia and Maryland.

Bull. Geol. Soc. Amer., vol. v, 1893, p. 24.

(Abst.) Amer. Jour. Sci., 3rd ser., vol. xlvi, 1893, p. 305.
