

policy of the State of Maryland in the whole field of higher education during such future period of years as the Commission deems proper to provide for, and to formulate a general State plan or program for carrying out and financing such policy during the period of years so determined; and to this end the Commission shall investigate and study the present and future needs of the University of Maryland in all its branches and departments, and the extent to which such needs should be met in whole or in part from State funds or from University receipts, or both, and the extent to which funds should be sought or received from outside sources. The Commission shall also investigate and study the present and future needs of all the colleges and institutions for higher education which receive State aid, and shall recommend to the Governor and the Legislature of 1931 what it considers should be the relationship between each one of these and the State, as to financial aid or support from the State and in every other respect, during the future period of years determined upon as aforesaid. And the Commission shall have general power and authority to make all investigations and studies it deems proper to enable it to recommend to the Governor and the Legislature of 1931 a coordinated State program for higher education, together with the part each educational institution in the State should perform therein and the financial and other obligations of the State to all such institutions.

SEC. 3. *And be it further enacted*, That as part of such investigation and study, the said Commission shall give especial consideration to the relationship between the University Hospital, on the one hand, and the University of Maryland and the State, on the other, and shall report to the Governor and the Legislature of 1931 what it considers the policy of the State towards the University Hospital should be during such future period of years as the Commission deems proper to provide for; what it considers will be the needs and what should be the policies of the University Hospital, during the period of years so determined, as to organization, administration, the care of patients, teaching, research, construction, location and in every other respect; and the extent to which the Commission considers such needs of the Hospital should be met by the State and the extent to which they should be met from outside sources or agencies other than the State.

SEC. 4. *And be it further enacted*, That the Commission shall prepare its report in printed form and shall submit the
