

GOING, OFFER SATISFACTORY PROOF OF HAVING COMPLETED A ONE YEAR INTERNSHIP IN AN INTERN TRAINING PROGRAM APPROVED BY EITHER THE AMERICAN MEDICAL ASSOCIATION COUNCIL ON MEDICAL EDUCATION OR SUCH OTHER AGENCY RECOGNIZED BY THE NATIONAL COMMISSION ON ACCREDITING AS AN AGENCY FOR THE APPROVAL OF INTERN TRAINING PROGRAMS. The Board, if satisfied with the application filed, shall direct the secretary-treasurer to issue to said applicant an order for examination, and when said applicant shall have passed an examination as to proficiency satisfactory to said Board the president thereof shall grant to such applicant a license to practice medicine and surgery in the State of Maryland. If the Board of Medical Examiners shall have refused any application, either for want of the qualifications necessary to entitle such applicant to an examination, as hereinbefore provided, or for want of proficiency of such applicant upon being subject to an examination, then the Board shall not entertain or pass upon a subsequent application from said applicant until after the expiration of six months from the rejection of said previous application. The Board is authorized to license without examination applicants who present proper certificates of proficiency and professional standing at the time of application issued by the National Board of Medical Examiners *or the National Board of Examiners for Osteopathic Physicians and Surgeons* or boards of medical examiners of the District of Columbia and of other states, the requirements of which are as high a standard as those governing the Board of Medical Examiners of this State; provided such boards of such states or district grant the same privileges to licensees of the Examining Board of Maryland; such applicants, however, from the National [Board] *Boards* and the District of Columbia and other states still being required to furnish the same proof of qualifications required of other applicants by this section. The Board may, in its discretion, grant a license upon a special examination to a physician or surgeon from another state, the District of Columbia, or a foreign country, provided the applicant has met all the preliminary and professional qualifications required for obtaining a license by examination in this State, has been in reputable practice for a period of ten years, and has reached a position of conceded eminence and authority in his profession. Medical *or osteopathic* students, at the end of their second year of study, who have, as verified by the certificate of the dean of the college which they have attended, completed the studies of anatomy, physiology, bacteriology and medical chemistry in said college, shall on suitable application approved by the Board be examined in such studies by the State Licensing Board, the result of said examination to be considered as a part of the final examination, the full regular fee to be paid at this time, no part thereof to be returned, but placed to their credit for the remainder of the examination yet to be taken. Medical *or osteopathic* students who have, as verified by the certificate of the dean of the college which they have attended, completed a full four years' course of studies and lectures, but who have not yet received their diplomas, shall upon suitable application approved by the Board be examined in all the branches enumerated in Section 123 of this article by the [State Licensing] Board, the final certificate and license of the said Board being withheld until the diploma of the proper medical *or osteopathic* college, with the candidate's name inscribed, be presented to the secretary of the Board.
