

provided and placed at each electrical station, substation, transformer station, and permanent pump station out of the area of smoke in case of a fire in the station.

(c) After every blasting operation, an examination shall be made to determine if any fire has started. If a fire occurs, the person discovering it and any person in its vicinity promptly shall attempt to extinguish it. If the person cannot extinguish the fire, he immediately shall report its existence to a competent official of the mine. The official shall order all workers from that part of the mine affected by the fire, except those needed for fire fighting.

(d) If the fire gets out of control, workers shall be withdrawn and the whole or part of the mine which is affected shall be sealed or flooded, as conditions require. Every fire-fighting operation is under the direct supervision of the mine foreman or a designated assistant who shall consult with the district mine inspector.

(e) Underground structures, such as transformer stations, battery-charging stations, motor generator stations, foremen's stations, substations, and permanent pump rooms, shall be of fireproof construction. Fireproofing material in contact with timber or coal shall not be metal.

(f) Rheostats, electric heaters, and resistors shall be located a safe distance from any combustible material.

(g) Where practicable underground power wires shall be de-energized on any idle day or shift.

(h) The Bureau shall establish procedures to be followed if there is a mine fire or explosion.]

[7-448.

A fireproof underground storage place shall be provided for oil and grease in excess of two days' supply. Oil and grease kept in a face region or other working place shall be in a portable, closed, metal container.]

7-450.

[(a) Adequate equipment shall be kept at each mine near the mouth. The equipment shall be sufficient for the number of persons employed, as required by the Bureau. It shall be used in caring for any person injured in or about the mine, and for taking him to his home or a hospital.

(b) If a person receives any injury in or about any mine, the mine foreman shall immediately see that the injured person receives adequate medical attention.

(c) If the Governor, on the recommendation of the Commissioner of Labor and Industry approves, the Bureau may
