

1 rather than taking the time that would be involved to
 2 accomplish it; but I do feel that before we really com-
 3 plete our deciding of the various issues that we've got
 4 to decide, we have to fully and accurately know what kind
 5 of government each of the counties is operating under,
 6 what kind and type of administrative governmental setup
 7 each and every one of the municipalities in the State is
 8 operating under.

9 In other words, my thinking is a listing and
 10 compilation of all of the existing governmental forms of
 11 all of the local units, county, city, village, town, et
 12 cetera, throughout the State and an analysis of each of
 13 those administrative governmental operating forms. With
 14 that information in the background, then we can go for-
 15 ward and see what we are going to do by way of revising
 16 it or changing it, or what we are going to do with it.
 17 Of course, I feel that a lot of that information is within
 18 the minds of the members of the Committee. However, I
 19 think we have to have a full and complete compilation and
 20 analysis of all existing governmental forms throughout
 21 the State in all of the local subdivisions.
