

in frequent use in need of repair. The photoduplication department has begun to place in the county courthouse copies of the Land Records which have been removed to the Hall of Records and it has expanded its services to include microphotography.

The Archivist is only in small part responsible for the great amount and the uniform excellence of the work of the past year. He has been assisted by the sympathetic understanding of all of the members of the Hall of Records Commission and by the positive collaboration of some of them. The Archivist has only given direction to the work of the professional staff, the labor has been theirs. Moreover, in addition to his regular staff, he has had the loyal and fruitful cooperation of the Work Projects Administration and the National Youth Administration workers without whose presence none of the large labors of unfolding and arranging and indexing could have been attempted.

Respectfully submitted,

MORRIS L. RADOFF,
Archivist.

Hall of Records,
Annapolis, Maryland.
