## NE PLUS ULTRA

**SOAP,**

*Warranted to Wash in Hard, Soft or Salt Water.*

**COPY RIGHT SECURED.**

The subscriber, (a PRACTICAL SOAP MAKER of more than twenty-five years' experience,) having long entertained the belief that a SOAP, superior in quality to the *Yellow or Rosin Soap* in common use, could be made, without increasing the price beyond that now paid for such Soap, has, after more than eighteen months' assiduous application in study, labor and experiment, succeeded in producing an article (pure in its *alkaline properties, and without adulteration*), which cannot fail to become the universal favorite of all families. This Soap is suitable for cleansing all kinds of LINEN, COTTON and WOOLEN GOODS; in short, every thing for which Soap is at all useful as a detergent; combining the qualities of the *Chemical Olive Soap*, with the *low price of the Yellow or Rosin Soap*, as it is termed, renders it a most important desideratum to all consumers of Soap; and when these qualities are taken in connection with its value as a cleansing medium, it becomes, in truth, the NE PLUS ULTRA of all SOAPS.

The subscriber is willing that this Soap, shall stand upon its own merits, and with this declaration submits it to the citizens of Baltimore, and all, who by practical experiment, have become competent judges of the merits of good Soap. He warrants it to wash in *Hard or Salt Water*, as well as in *Soft Water*; consequently it is as useful to the mariner at sea, as it is to his family at home; and to persons living in districts where *Hard water* abounds, this Soap is invaluable.

*A Copy right Label is affixed to each bar of Soap.*

The subscriber in offering this Soap to the public, has no special directions to give in the use of it, but leaves it to the choice of the consumers to adopt any mode they may think best. He guarantees that it will do the same work that the *Chemical Olive, Cream Soap* or any other *Labor Saving Soap* will do if used in the same way; he would merely recommend, as a means of saving *labor, time, and fuel*; that all *white clothes* be soaped where the soiled parts are seen, and put to soak over night in sufficient cold water to cover them; the next morning the spots can easily be removed by rubbing them in the common method of hand washing; rinse them well, and hang them on a line, to dry in the sun, when your clothes will be beautifully white and clean. A good Suds is all that is necessary to wash *woolens, calicoes, and all articles, such as silks, worsteds, cottons, linen combies and muslins*; also, *paints, furniture* of any kind, *gildings, &c.* To remove grease from *Carpets, Shavings or Floors*, apply the soap in full strength. Many testimonials have already been received by the subscriber, as to the superiority of this Soap.

**MANUFACTURED ONLY BY**

**MOSES HYDE,**  
**No. 210 MONUMENT STREET,**  
 NEAR ASHLAND SQUARE,  
**BALTIMORE.**
