

## EXECUTIVE ORDERS

## Transportation and Freight Movement Plans.

(3) Assisting in the development of intermodal plans involving interconnections between railroad transportation and other modes of transportation.

(c) Participate in the Transportation Program Planning process by:

(1) Developing the railroad services component of the Consolidated Transportation Program.

(2) Coordinating railroad transportation programs with plans and programs of other governmental agencies, user organizations, and the railroad industry.

(3) Preparing the annual budget request for railroad transportation based on the Consolidated Transportation Plan.

(d) Conduct project planning and preliminary engineering related to railroad transportation facilities and supervise project planning and preliminary engineering performed by consulting engineers under contract with the State.

(e) Supervise construction of State-owned railroad transportation facilities and related capital improvements performed under contract with the State.

(f) Supervise the maintenance and rehabilitation of State-owned railroad equipment.

(g) Acquire railroad lines, equipment and other property as authorized in the approved Transportation Program, as provided in the State budget.

(h) Monitor departmental activity in railroad grade crossing improvement modifications and advise the Secretary on matters concerning compliance with § 8-639 of the Transportation Article, regulations and process project approval requests.

(i) Prepare and maintain overall work schedule for railroad transportation activities and program.
